

StarLeaf meeting-rooms in a multi-tenant environment

Administrator:

StarLeaf Customer portal (one time setup)

Navigate to Integrations and create a custom integration granted admin rights.

Note: The custom name of the integration will currently be used as booking reference on the green button, therefore choose a good name.

Type: Custom integration

Name: starleaf.loopbooking.no

Administrator privileges:

Cloud API base URL: https://api.starleaf.com/v1

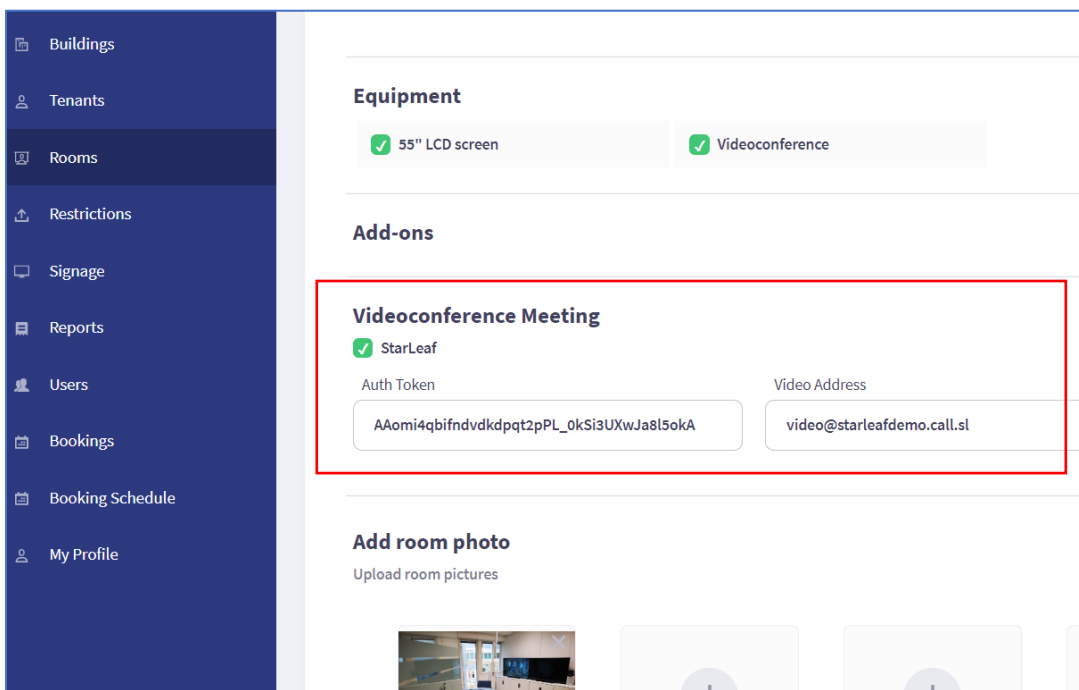

Token header name: X-SL-AUTH-TOKEN

Access token: AAomi4qbifndvdkdpqt2pPL_0kSi3UXwJa8I5okA

Regenerate access token:

Loopbooking portal (one time setup per room)

1. Copy the access token from the StarLeaf Portal and add that to the room where you want to use it in the booking portal.
2. Add the email from the respective hardware you want to add as Video Address.
