

Samsung - LoopSign Deployment Guide

LoopSign utilizes the built in WEB browser in your Samsung screen.

Please note that you need to have a Digital Signage screen from Samsung to make it work. Consumer models does not have the necessary built-in features.

the URL browser on older Samsung screens have some HTML5 compatibility issues. So please make sure you have the latest firmware – check with your reseller.

3.	Advanced Setup	. 6
4.	Older Samsung screens	12

1. Prerequisites

Make sure you have a Tizen based Professional Signage screen with the latest firmware. Contact your reseller, Samsung, or us directly to get the latest firmware.

Please note that consumer screen models will not work with Digital Signage, they do not have the necessary settings and features.

2. General settings

Initially you must make sure you have configured general settings correctly. Also if the screen has been used before, update firmware and do a factory reset of the screen.

Factory Reset:

- Turn off the screen with the remote
- Press MUTE 1 8 2- POWER ON with the remote control (The screen will now after a few seconds boot in «root» mode.
- Select «Options» in the menu and then select «Factory Reset» two times

When the screen starts it will take you thru a setup guide, please follow these steps.

- Choose language

- Choose "Basic Setup"

- Set correct time/date

Correct time and date are essential for LoopSign!

Your initial setup is now done, please proceed to advanced setup.

3. Advanced Setup

- Choose "Menu", "System", "Time", "NTP settings"

Make sure your time zone is correct and add a NTP server. For example, *pool.ntp.org* Save and the screen will reboot.

NTF	Settings
Network Time Protocol	Use
Server URL	1.pool.ntp.org
Time Zone	Amsterdam, Berlin, Bern, Rom

- Choose "Menu", "System", "Power Control"

and set the settings like the picture below.

It is highly recommended to configure automatic on off according to your needs.

To shut down the screen when it's not needed will prolong its lifespan. Even if you require your screen to be on 24/7, schedule a short on/off each night (For example off 02:57 and on 03:00) This to give your screen a daily reboot.

- Choose "Source", "Browser" then press "Arrow up"

Set refresh interval to 30 minutes and Home Page custom. Then set your correct LoopSign URL <u>https://play.loopsign.eu/app/xxx/xxxxx</u>
