

Installation of LoopSign on a Viewsonic CDExx30 series signage display

Introduction

This document summarizes how to install and run LoopSign on Viewsonic Signage Display CDExx30 series.

Link to LoopSign APK: <u>https://loop24.no/lsph.zip</u>

Go through the first-time installation setup.

Choose English language.

Connect the screen to internet enabled network (ethernet recommended).

Keep the default setting of having the screen automatically sync time and date, or set manually. (Automatic sync will work best in most cases.)

Install the LoopSign Player app

Preparation:

Download the LoopSign app for Android and put it on a FAT32 formatted USB stick. Insert the USB stick into the screen. <u>https://loop24.no/lsph.zip</u>

Press the Home button on the remote and enter the Settings app. Go to Device → Signage Display and enable "Unknown Sources".

Adjust the screen menu options for power saving and scheduled on/off

Press the Menu button on the remote to open the screen menu as shown below. Go to Advanced and set the following:

- Boot on source → Custom
- No Signal Standby → OFF
- Switch on state 护 Forced on

Finishing steps and putting your LoopSign screen and content into operation

Turn your screen off and on with the remote. Turning off the screen may initiate a necessary firmware upgrade of the screen. The upgrade will take about 5 minutes.

When the screen turns back on, the LoopSign Player app should automatically start. The app will show the screen's unique code that you can pair with your LoopSign screen in your LoopSign account.

Enter «Settings» for the screen in LoopSign

Enable "Samsung Tizen or Android LoopSign Player" and enter the HASH code from your screen

Edit Screen	×
SCREEN NAME	
Transport	
UNIQUE SCREEN LINK	
271879	
GROUP OF SCREENS	
Standard (Default)	~
IP ADDRESS	
Samsung Tizen or Android LoopSign Player	
TIZEN HASHES	
VSS1N44	ů

Save settings and your screen will start to play the content.

After successfully pairing the screen, your content will automatically start showing.

Congratulations! You have successfully set up your ViewSonic CDE30 screen to run LoopSign! ③
