

How to install LoopMeeting on a IADEA / Meetio panel

1. Load the panel with a "fresh" firmware.

(This to make sure the firmware is without the Meetio application.)

Go to IADEA support page:

https://support.iadea.com/hc/en-us/articles/900003536086-XDS-1078-Firmware-Android-7-1-OS

Note: If you have a different Android version on your panel, please select the version that corresponds to the model you have.

Download firmware.

Upgrade instructions

- Download the latest firmware using Chrome or Firefox web browser and copy it onto root directory of an USB drive
- Power on device and plug in USB mouse to the device
- From Basic Settings menu, go to Advanced > System > Firmware Update. Insert USB drive to the device and do NOT remove USB drive until player reboots to the Basic Settings menu

NOTE:

If the Meetio software still is present on the panel, please follow these additional instructions.

- 1. Download the addon: <u>https://s3.us-east-</u> <u>1.amazonaws.com/download.us.iadea.com/support/add_on/addon-Neutral-</u> <u>Android7(1.0.2).pkg</u>
- 2. Prepare a USB pen drive in FAT32 format. Put the downloaded .pkg file into the root directory (make sure that there is only 1 .pkg file to avoid conflict)
- 3. Plug the USB pen drive onto the device
- 4. On the device, navigate to the Android settings app and find [System] > [Update] > [Manual through USB]
- 5. Installation will start and it will reset the device automatically

2. Configure the panel

https://loop24.no/lmoem.zip

- Unzip the .APK file and copy it to a USB stik (Use the same as you used for the firmware update)
- Plug in the USB stick in the IADEA panel.
- Start IADEA the panel
- Select «Advanced»

Find and select the LoopMeeting APK file

Confirm that it accepts to be installed from «Unknow sources" and select the file again to install.

Important: When the file is installed, select «Open» Then it will set important basic settings

© Loop24 AS, Olf Helsets vei 6, 0694 Oslo, Norway - info@loop24.no - https://loop24.no Page: 4

Exit the app / restart the panel so come back to the default start screen.

Then select "Advanced"

| Basic settings | Advanced |
|--|----------------|
| | English |
| Network | |
| Ethernet Connected IP 192.168:0.218 | |
| Wireless LAN Disabled | |
| Time zone | |
| Wednesday, October 16, 2 Eastern Daylight Time (GMT-4:00) | 2024, 12:09 PM |
| Content | |
| | |

Then select "Content" then select "App Start

Then write in exactly as shown below.

(This will make sure the app autostarts in "kiosk" mode.

| Class name: | no.loopmeeting.ui.SplashActivity |
|-------------|----------------------------------|
| Class name: | no.toopmeeting.ut.SptashActivity |

Action: android.intent.action.VIEW

Scroll down and Press "Set" in bottom
